

G1 as built measurements

This is the G1 cell currently in use (10/21/99) as measured by Steve Christo.

Cell walls and windows are 0.005" Kapton, shown in black.
Cell base structures are Torlon, averaging approx. 1mm back to 135°, shown in blue.

Note:

Eccentricity of the Kapton cell is .51mm downstream. No measurement was made for eccentricity on the upstream end.
