

Applied Research Center Student Newsletter

Lab Visitors

Erin Secord, a mechanical engineer and conservator from the Mariners Museum, is shown here working with Olga. Erin is examining her USS Monitor samples using our Fourier Transform Infrared Spectrometer (FTIR).

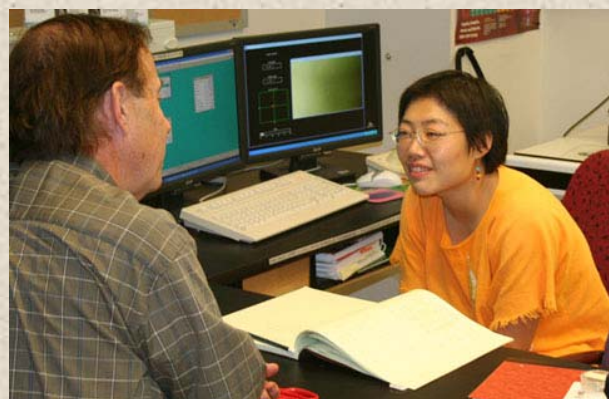

Olga is shown here explaining the principles of the FTIR to Erin. Olga is the WM FTIR instructor at the ARC and normally teaches a class to students once a month. The students who attend are from all the area universities and institutions. Anyone wishing to take the class should sign up on our web page at <http://web.wm.edu/research/equipment/>

Lab Visitors

Mahzad Bastani - Nejad, an ODU Graduate student, is shown here working on her project using the Hirox microscope.

Dr. Michael Kelly talks with Liang Zhao, his newest WM Grad student, about her work using the AFM.
