William and Mary MBA
Students Visits Labs

New WM MBA Students visited the William and Mary Labs to see how business and science come together to form a covalent bond. During the visit Haijian gave the students an in depth introduction to the Tof-Sims.

Natalie introduced the students to the Hirox Microscope. She is shown here showing them the tobacco seed from the Jamestown Seed project.

Throughout the day, the students attended presentations. Shown here is Mike Weber from Soluble Solutions.

Lab Visitors

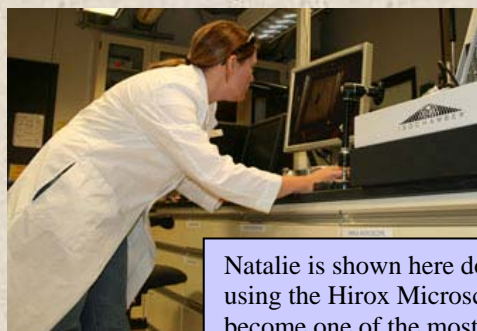

Dr. Michael Kelly is shown here introducing Bio-chemical engineer Mary Draney to the equipment in the ARC Labs.

Joan Thomas a researcher at the ARC Labs visited on her birthday to give her daughters Alicia & Nadine, who flew in from Australia, a glimpse at where she has been doing her research.

Natalie at Work on the Hirox

Natalie is shown here doing work using the Hirox Microscope. It has become one of the most heavily used equipment in our labs.
