

12 GeV Accelerator

2/28/13

Cryomodules:

- C100-3 installation completed
- C100-6 taken to the tunnel
- C100-8 going in to Test Cave

Power:

- HOM filter deliveries finally on track
- Circulators still a concern
- Continuing to do install of NL zones
- Box supply vendor doing fine; first two coming this (next?) month

Cryo

- Have run all 5 warm compressors
- HDR cooling to 4K

BT:

- Started rework in beamlines to halls
- Started install of HD beamline
- First BCOM should go to tunnel soon
- Resources very tight for completion on schedule; alignment a big concern

Extraction:

- Start cavity assembly next month; parts coming

I&C/S

- Diagnostics on the shelf ready for install
- Functional review of bpm electronics was held.
- Safety group schedule is tight considering non-12GeV scope
