Hall C HV-EPICS Test Station Project

May 15, 2019

DSG Staff: Pablo Campero

1. Wrote and tested Java code to be executed in CSS Studio.
    1.1. Code allows to set values at once for all channels of HV board.
    1.2. Created individual java code to set values like: VSet, Imax, Ramp Up/Down, and Trip time.

2. Installed VisualDCT on dsg-b-linux1 PC to star data base creation.
