DETAILS:

Below are the results of the elevation survey for the drive laser line. The elevation of the named optical centers were measured directly with theodolite at the ceiling location. The beam elevation is 105.000 meters.

POINT	ELEVATION
PF10V04	107.347 m
PF10V06	107.338 m
PF10V08	107.330 m
PF10V10	107.325 m
PF10V12	107.337 m
