Below are the results from the DVCS mapping fixture alignment carried out on Jan 6, 2009. A coordinate system was established based on the magnet center using the fiducial data from July 2005. $A+X$ is to the beam left, $a+Z$ is downstream, and $a+Y$ is up. Values are in millimeters. Points $A, B$, and $C$ are fiducial survey targets 7.94 mm downstream from the fixture face. The CL points are circles constructed from the three $1 / 4^{\prime \prime}$ fiducial holes at the downstream face.
