**DETAILS:**

data : step2b\halld\dirc\190204a

The beam right bar box mirrors were located on February 4<sup>th</sup>, 2019. The results are shown below.

The ideal coordinates for the Hall D target and the Hall D 'zero' point shown in meters relative to the CEBAF coordinate system. The found location for the beam right mirror box is show (Cebaf system – meters). Additionally, the found yaw, pitch and roll are shown at this point. The angles were based on the fiducialized data. Positive yaw is the counter clockwise rotation about the Y axis; negative pitch is the clockwise rotation about the X axis (physics standard); positive roll is the clockwise rotation about the Z axis.

The second table shows the planes of the mirrors based on the location of the fiducialized data, then transformed into the found survey data. A centroid point and normal point are given for each plane. The resulting plane formula data (ABCD) is shown along with the calculated rotational values. Units are millimeters and degrees from the Hall D target.

Ideal Location	Cebaf Coordinate Location [meters]			Angular Position [ degrees ]		
	X [m]	Y [m]	Z [m]	Yaw°	Pitch°	Roll°
Target	80.60000	104.70000	398.78983	0.00000	0.00000	0.00000
Hall D 'Zero'	80.60000	104.70000	398.13389	0.00000	0.00000	0.00000
<b>Found Location</b>						
BR – BOX center	77.58716	104.39449	403.94400	-0.03319	-0.22928	0.038206
