DETAILS:

Data: Step 2b\HALLA\130312A

Below are the results from the Hall A dump viewer survey carried out on Mar 11, 2014.

Note: Because of the difficult access to the face of the viewer inside the enclosure, the accuracy is estimated to be approximately within 3 millimeters.

Viewer is 7 millimeters to the right from ideal as you look downstream.

Viewer is 5 millimeters below ideal beam center.
