### Details:

Below are the results from the superharp survey carried out on April 15<sup>th</sup>, 2003. The values represent the difference in millimeters from the ideal position of each fiducial. A positive X value is to the beam left, a positive Y is too high.

### Superharps

	<b>DX</b>	<b>DY</b>	<b>locations in mm (+ is beam left)</b>
SH1H01A	0.212	0.230	
SH1H01B	0.278	0.190	
SH1H01C	0.307	0.190	
SH1H02A	-0.249	0.010	
SH1H02B	-0.187	0.070	
SH1H02C	-0.123	0.110
