

# Topics for YSTAR Discussion

- How can the Heavy Ion Expts. contribute ?
- Should these experiments rather measure pp ?
- How to go beyond “bump-hunting” ?
- From theory: how many  $Y^*$  do we need to measure?
- From experiment: how many are practically feasible?

# Topics for YSTAR Discussion

- Which type of reaction channels should be concentrated on?
- Which decays should be measured?
- Rates at Jlab – comparison to other facilities?
- How much potential/interest for  $K^0_L + A$  ?
- Other physics with  $K^0_L$  beam ?
  - Exotics
  - $K^0_L - A$  reactions
  - . . .
