

Jefferson Lab's Technology Stewardship Event

ACCELERATORS: DRIVING APPLICATIONS FOR SOCIETY

Keynote Speaker Robert W. Hamm,
Industrial Accelerators and Their Applications (Editor)

12.17.18
Register Today!

Learn. Connect. Engage. Advance.

**You are cordially invited to Jefferson Lab's technology stewardship event:
Accelerators: Driving Applications for Society, on Monday, Dec. 17, 2018 in
Newport News, Virginia.**

Accelerators, originally developed for research, can now be used to address national and international priorities, such as:

- Environmental Cleanup
- Medicine and Health
- Isotope Production
- Advanced Materials for Industrial Applications
- Alternative Energy
- National Security

Listen and engage as top industry experts highlight applications of advanced accelerators beyond that of scientific research.

Tour Jefferson Lab's advanced accelerator research, testing and production facilities in the SRF Institute.

Register by Wednesday, December 12
