

Re: Laser eye Examination

Dear Doctor:

The bearer of this letter is a visiting researcher at the Thomas Jefferson National Accelerator Facility ("Jefferson Lab"). In that capacity he/she will be using lasers.

Occupational health guidelines call for a comprehensive baseline ophthalmology evaluation of such laser users. A sample results letter and report form are attached for your reference. This individual requests that you perform his/her ophthalmology evaluation.

The lasers at Jefferson Lab are high power of class 3b and 4. Possible wave lengths include ultraviolet (far, middle, and near), visible and infrared (far, middle, and near).

Thank you very much for your assistance. Please fax a copy of your report form and results letter to me at (757) 269-7881 and provide copies to the patient also.

Sincerely,

A handwritten signature in cursive script, appearing to read "W.S. Chandler / mgg".

W.S. Chandler, MD, MPH, MS, FACOEM
