Below are the results from the Aug 27, 2010 survey carried out on the wien filter #2 girder. A +X is to the beam left from ideal, a +Y is up, and a +Z is downstream. The Z values are based on the ideal center of the wien filter at -257.2669 M in the CEBAF machine coordinate system. Values are in millimeters. Values for the aperture 1 hole locations are calculated using the pre-alignment data taken in the lab.
