

COMPTON ANALYSIS REPORT

PAWEL AMBROZEWICZ
NC A&T

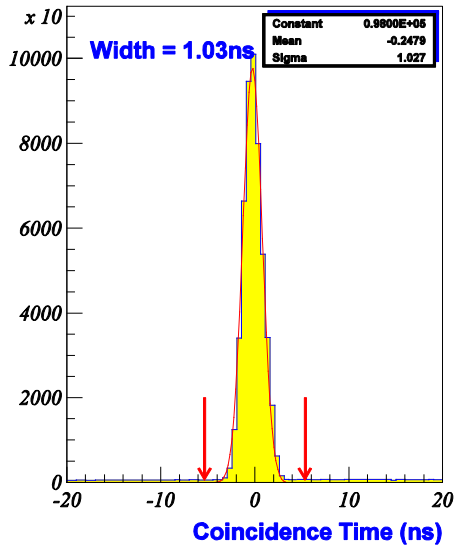

OUTLINE:

- **Event Selection**
- **Extraction Procedure**
- **Yield Fits**
- **Results**
 - **Total Cross Section**
 - **Total Cross Section (Large Statistics)**
 - **Forward Solid Angle Cross Section**
 - **Differential Cross Section**
 - **Time Stability**
 - **Uncertainties**
- **Summary**

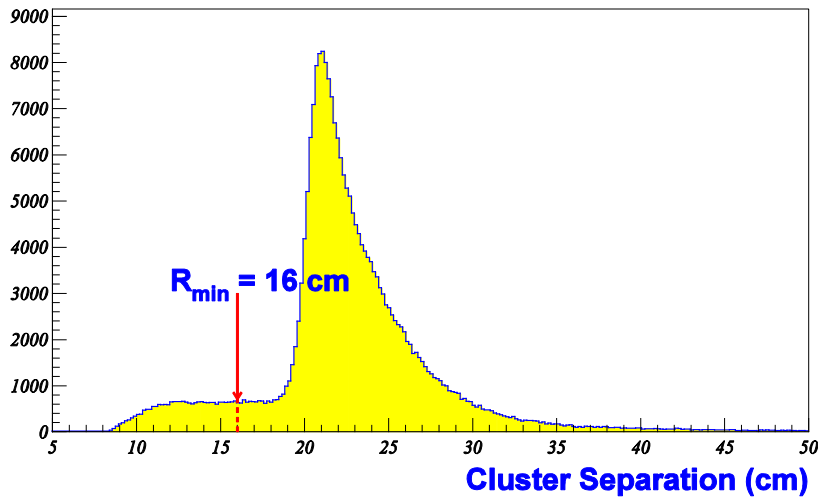

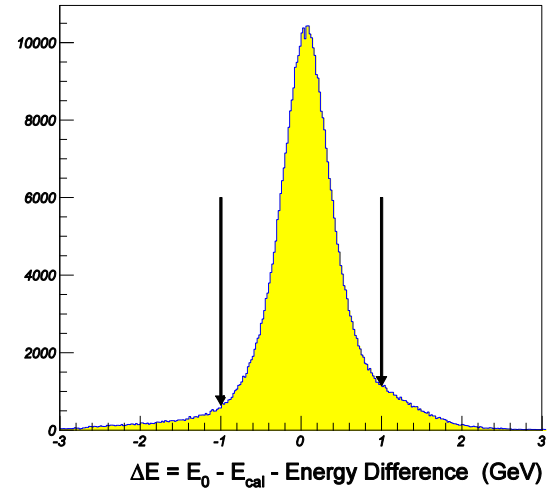

COMPTON EVENT

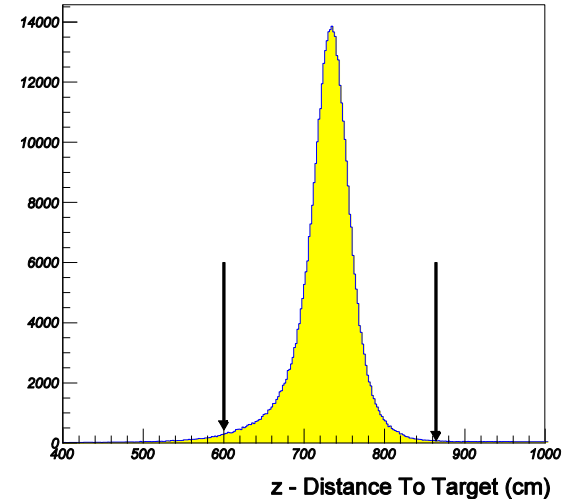

SELECTION CUTS

Energy Difference: $E_0 - E_{cal}$

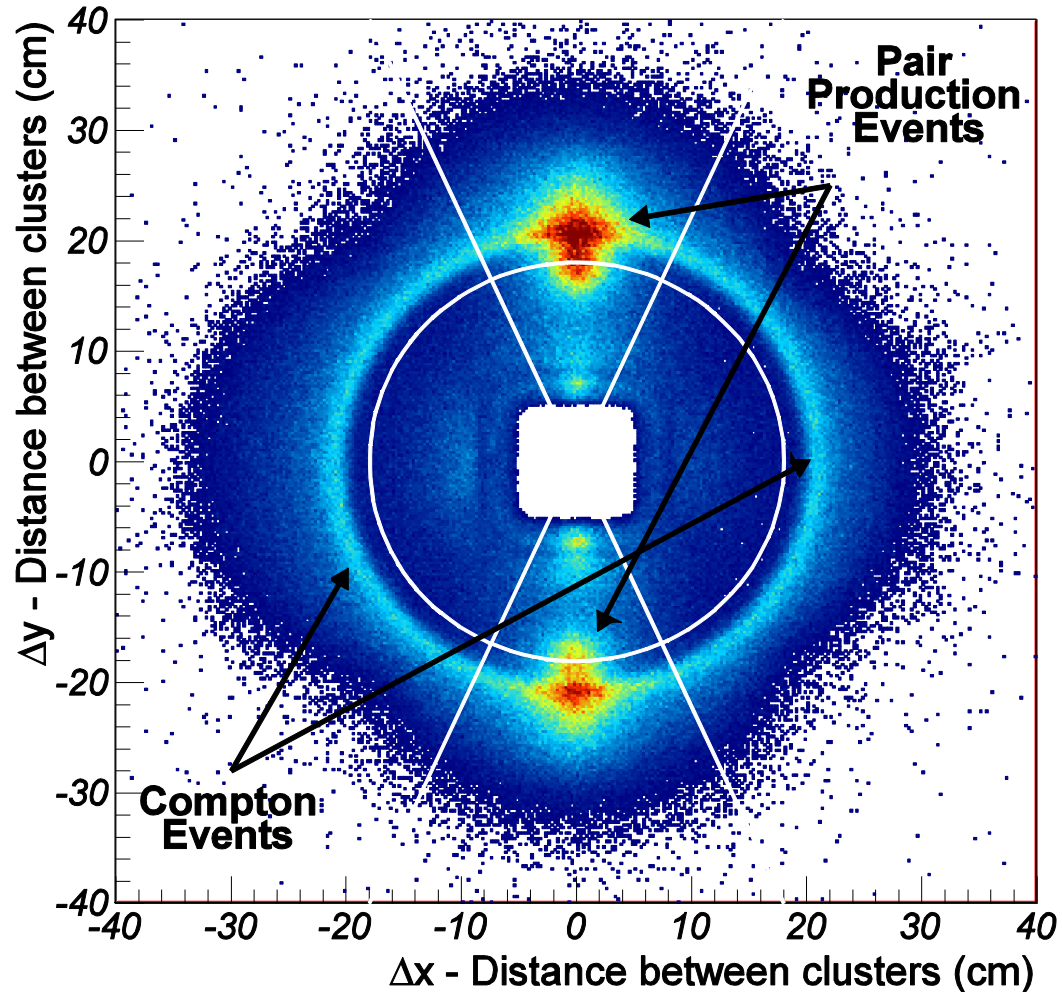

Opening Angle Based Distance To Target

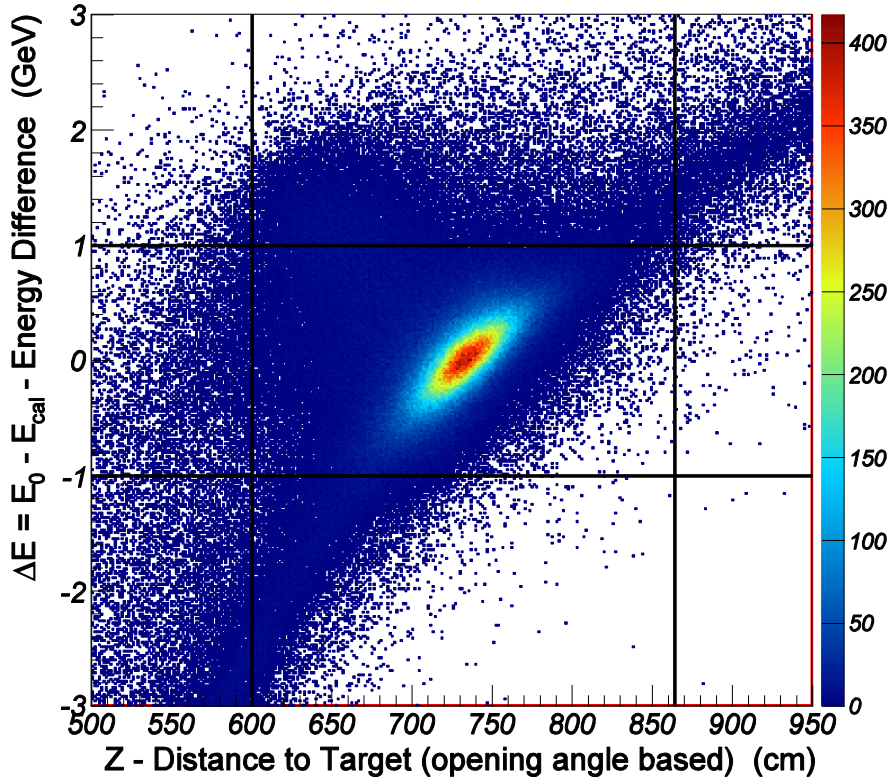

SELECTION CUTS

Separation Between Clusters: Δy VS. Δx - EXPERIMENT

SELECTION CUTS

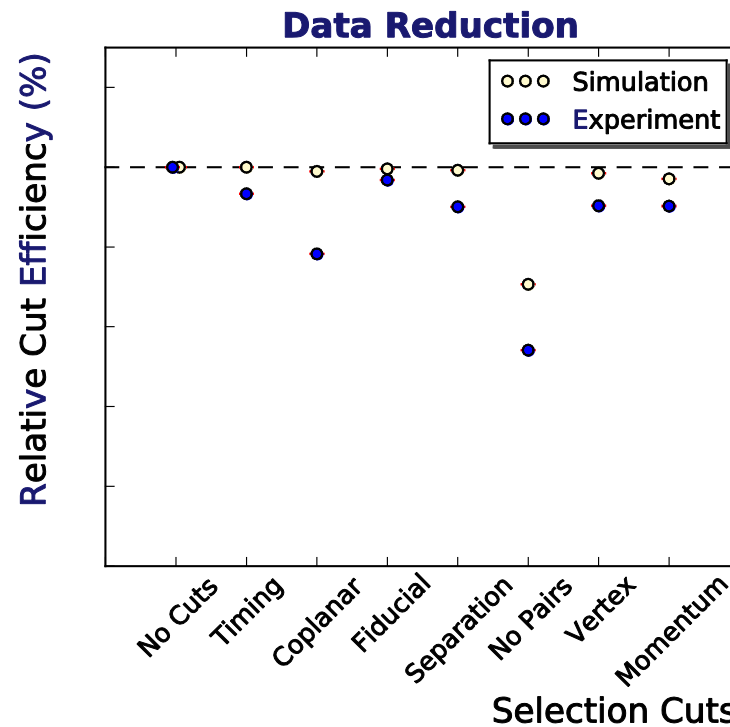

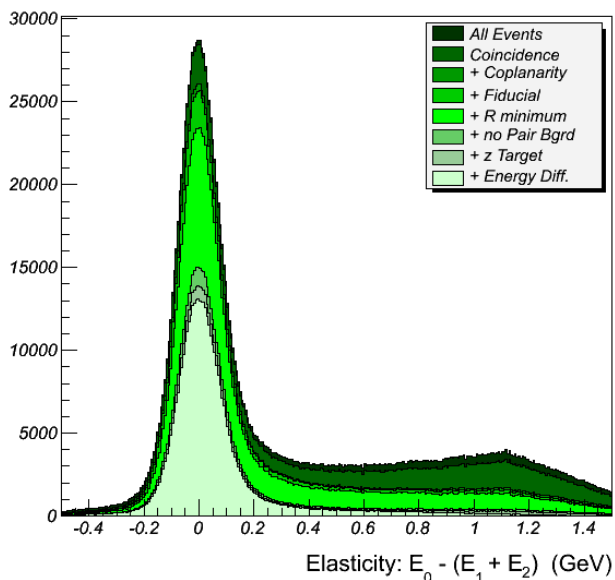

ΔE & Z Cuts in ΔE -Z Plane - Coincidence

ΔE & Z Cuts in ΔE -Z Plane - Accidental

SELECTION CUTS

SELECTION CUTS

Separation Between Clusters: Δy VS. Δx - EXPERIMENT

Separation Between Clusters: Δy VS. Δx - EXPERIMENT

Separation Between Clusters: Δy VS. Δx - SIMULATION

Separation Between Clusters: Δy VS. Δx - SIMULATION

BACKGROUND MODEL

Z VS. Elasticity - Coincidence

Z VS. Elasticity - Accidental

LINE SHAPE YIELD FITS

CROSS SECTION EXTRACTION PROCEDURE

TOTAL CROSS SECTION

$$\left\langle \frac{d\sigma}{dv} \right\rangle = \frac{1}{n_e \Gamma_\gamma \mathcal{A}_{exp}} \frac{N}{\Delta v}$$

FORWARD SOLID ANGLE CROSS SECTION

$$\sigma_{DAT} = \sigma_{KN} \frac{Y_{DAT}}{Y_{MC}}$$

TOTAL CROSS SECTION

FORWARD SOLID ANGLE CROSS SECTION

DIFFERENTIAL CROSS SECTION

Two Cluster Angular Distributions

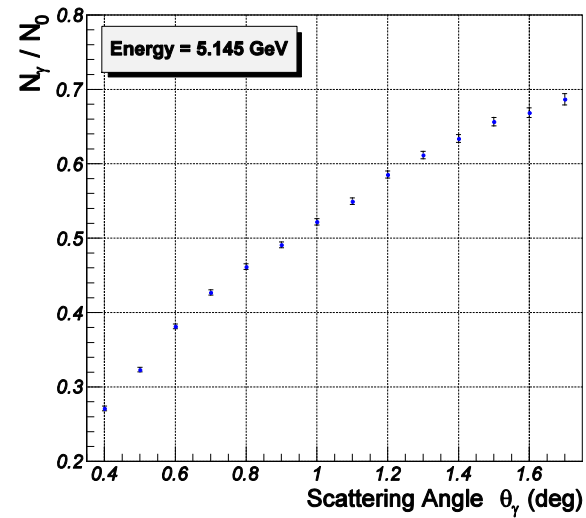

Signal/Background Distributions - Data

Electron And Photon Angular Distributions

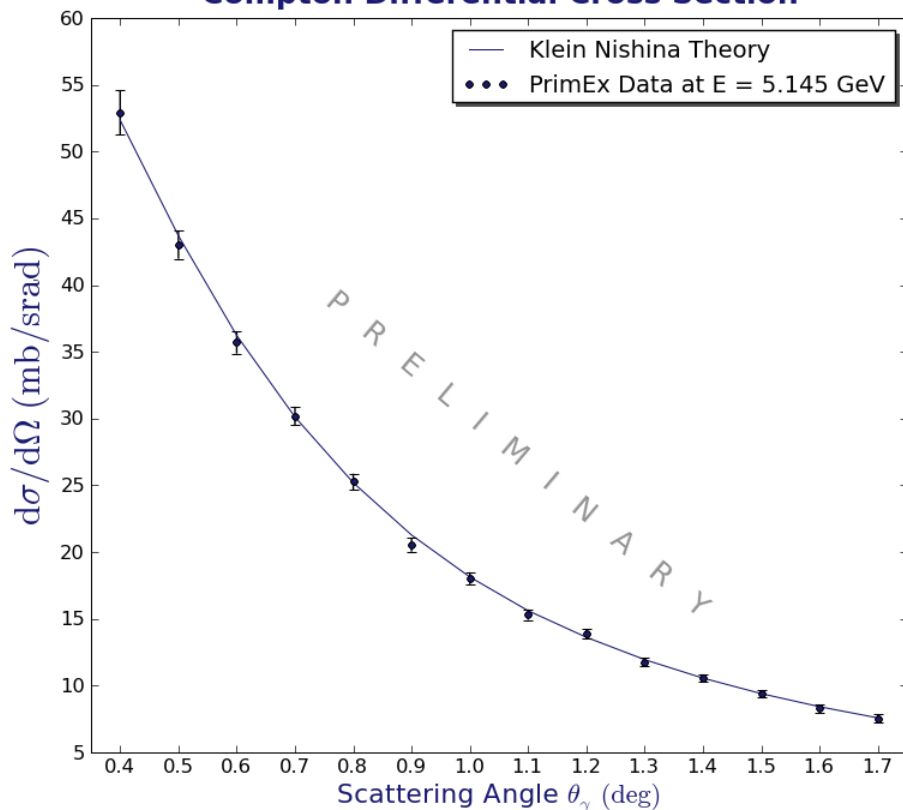

Relative Number Of γ 's Per θ_γ Bin

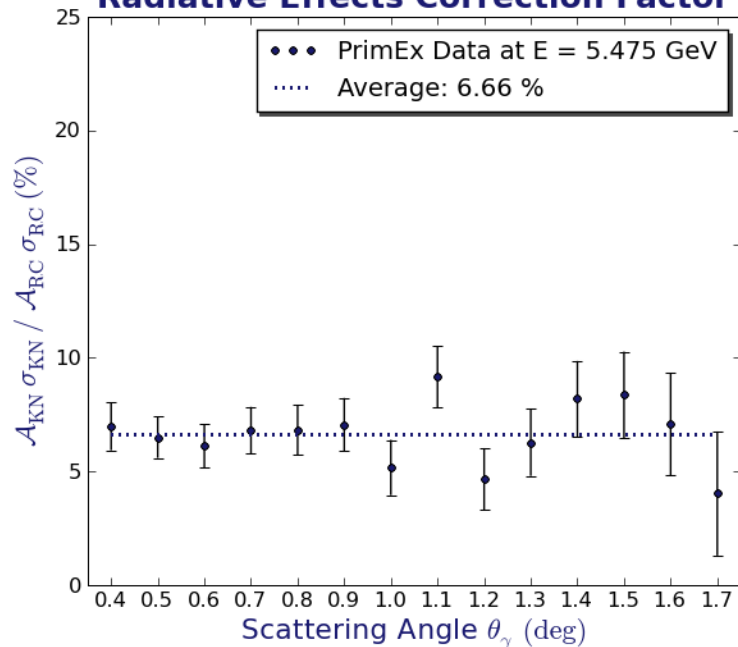

DIFFERENTIAL CROSS SECTION

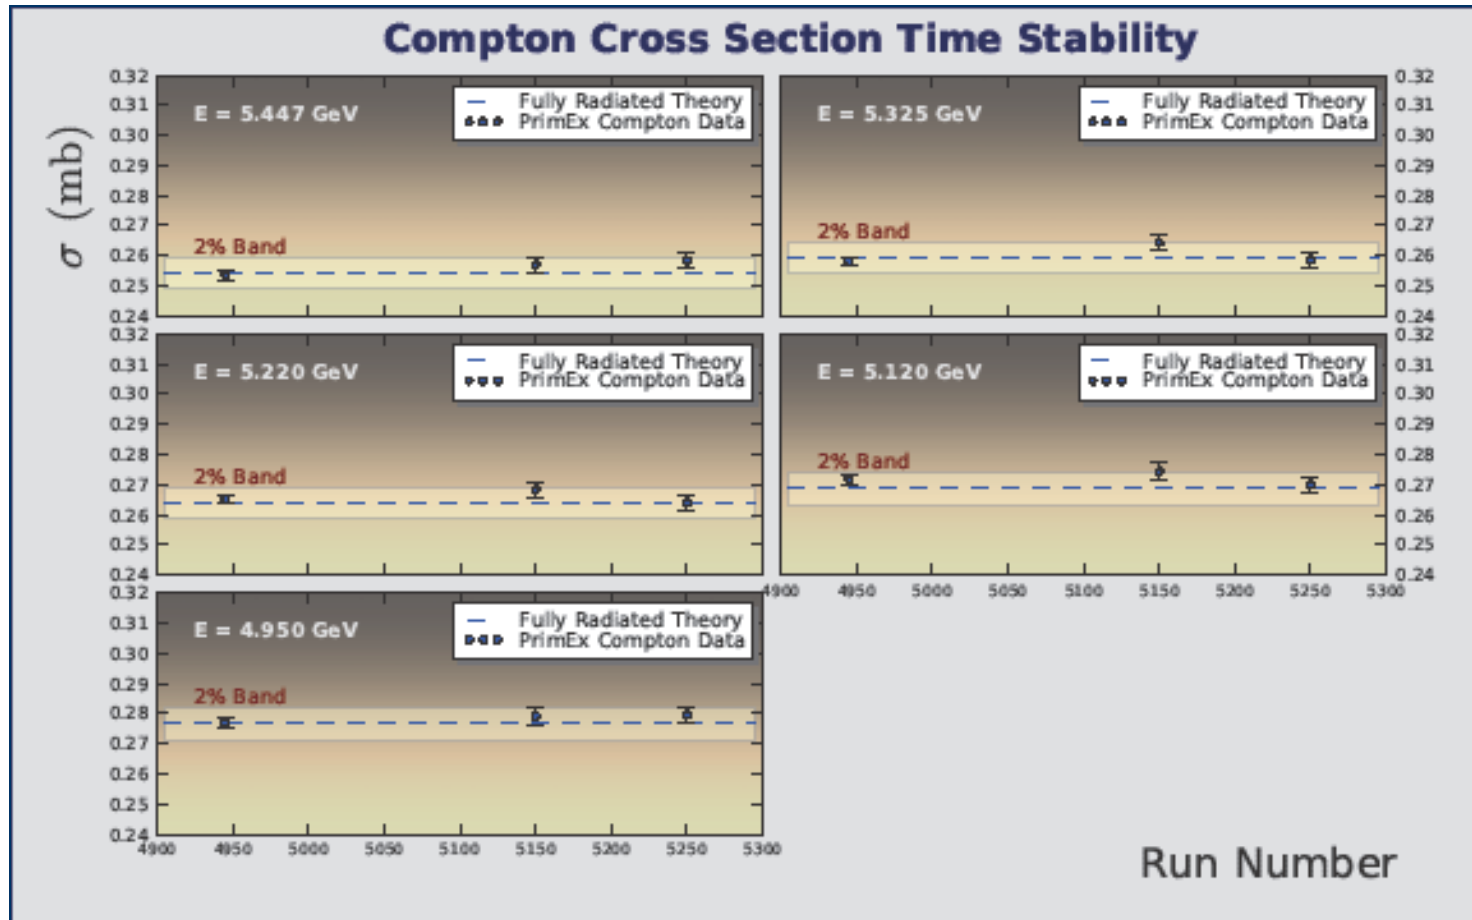

Compton Differential Cross Section

Radiative Effects Correction Factor

TIME STABILITY

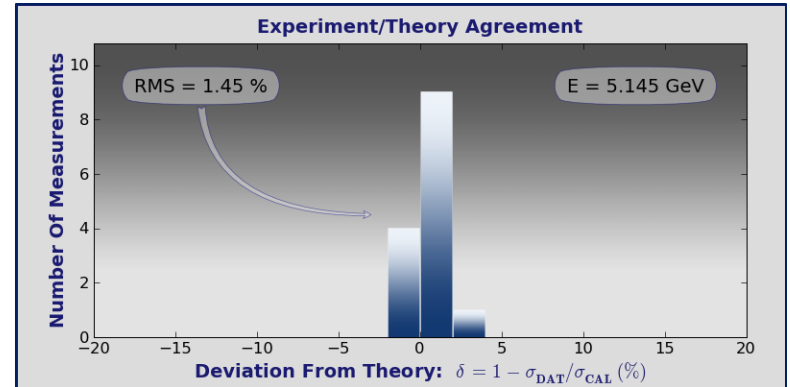

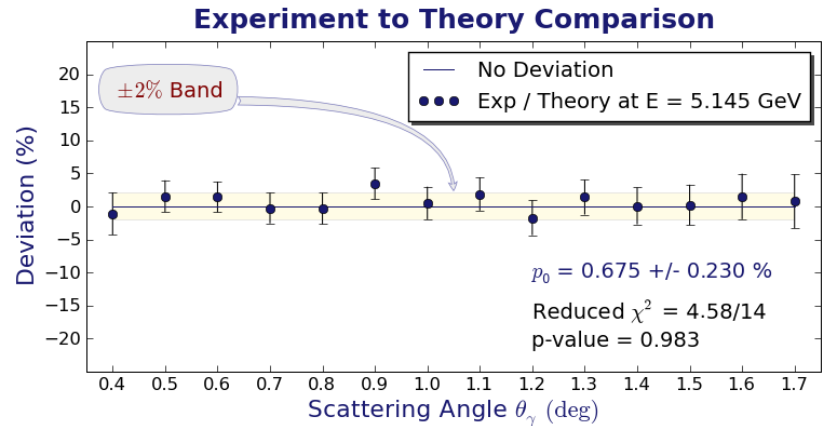

COMPARISON WITH THEORY

TOTAL CROSS SECTION

DIFFERENTIAL CROSS SECTION

UNCERTAINTIES

SUMMARY

This excellent data set provided:

- Good control of systematics
- Wide range of results:
 - Total cross sections for 11 energy bins
 - HyCal Solid Angle cross sections (11 energy bins)
 - Differential cross sections
 - 15 angle bins for each energy
- Results compare very well with theory

Improvements:

- Simulation of the background would help to:
 - reduce systematic uncertainties
 - increase control of systematics
