

### **JLab Wellness/Mother's Rooms**

In an effort to support a more positive, relaxing environment for the lab community and new mothers at the lab, there are now two dedicated wellness/mother's rooms available for use. One is located in the CEBAF Center (Bldg. 12) Room F333 and the other is located in the Accelerator Maintenance Support Building (Bldg. 87) Room 113. Each room has a refrigerator, seating and a nearby sink.

When space is not in use by a new mother, the room is available for anyone to take a quick breather and relax. The lock on the door handle will indicate when the room is in use. In the case of emergency, there is a break glass case containing a key outside the door.

Should you have any questions, contact Corry Smith, CRE Project Engineer at 757.269.7700 or via email at [csmith@jlab.org](mailto:csmith@jlab.org).

*The above information was originally shared in June 8<sup>th</sup>'s JLab Weekly. More Wellness/Mother's Rooms are planned to be ready in other buildings by next month. Once they are operational, communication will be shared through the weekly briefs.*
