

DSG Moller

Date: 03/01/2023

Time: 11:00 – 12:00

Attendees: Peter Bonneau, Brian Eng

1. Phoebus Screens

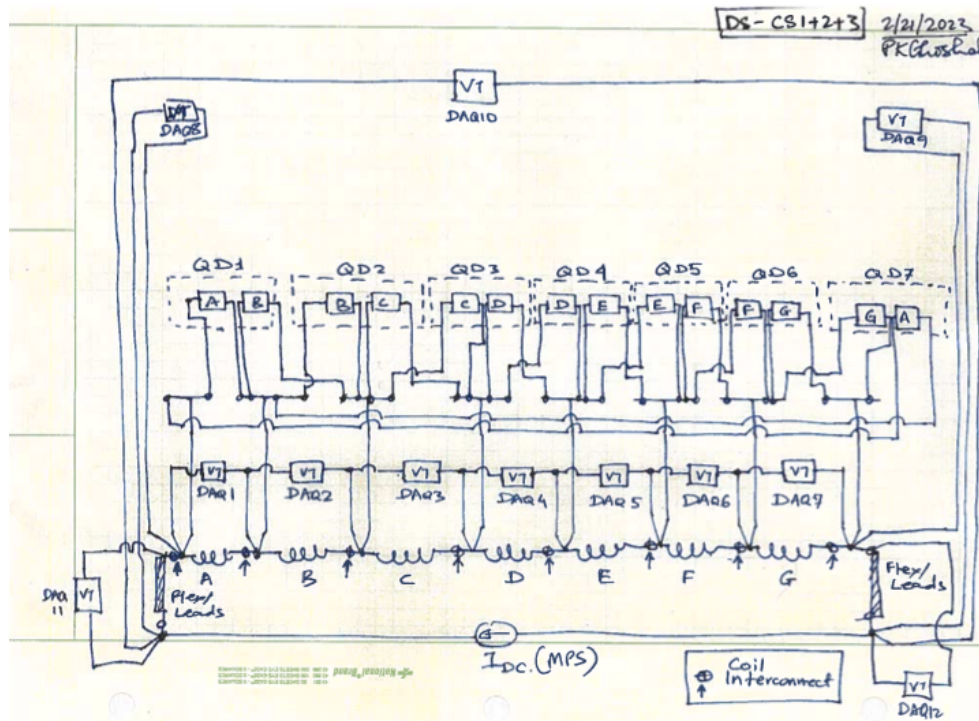

Mary Ann Antonioli, Brian Eng

1. Trying to use native widgets to draw background diagram instead of using a picture as the background. Picture looks pixelated at higher zoom levels, sometimes even bad at 100%
2. Using AutoCAD to get line segment properties so far has proven to be best way to generate information, but using the Phoebus widgets is still kind of a pain since all the points are in reference to the widget itself and not the screen.

2. VT Diagram

Probir Ghoshal

1. Probir generated a hand sketch of VT layout, only attaching coils 1, 2, 3; coil 4 slightly different due to double pancake coil layout.

3. Siemens PLC

Brian Eng

1. Received demo/loaner unit (power supply + controller + analog input module) from Distributor
2. Still waiting on Siemens for information on what to do about getting V17 instead of V18 of programming software
3. Also don't have a Hall A computer to develop on. Use Hall C one in the mean time?
