

**Abbreviation Reference**

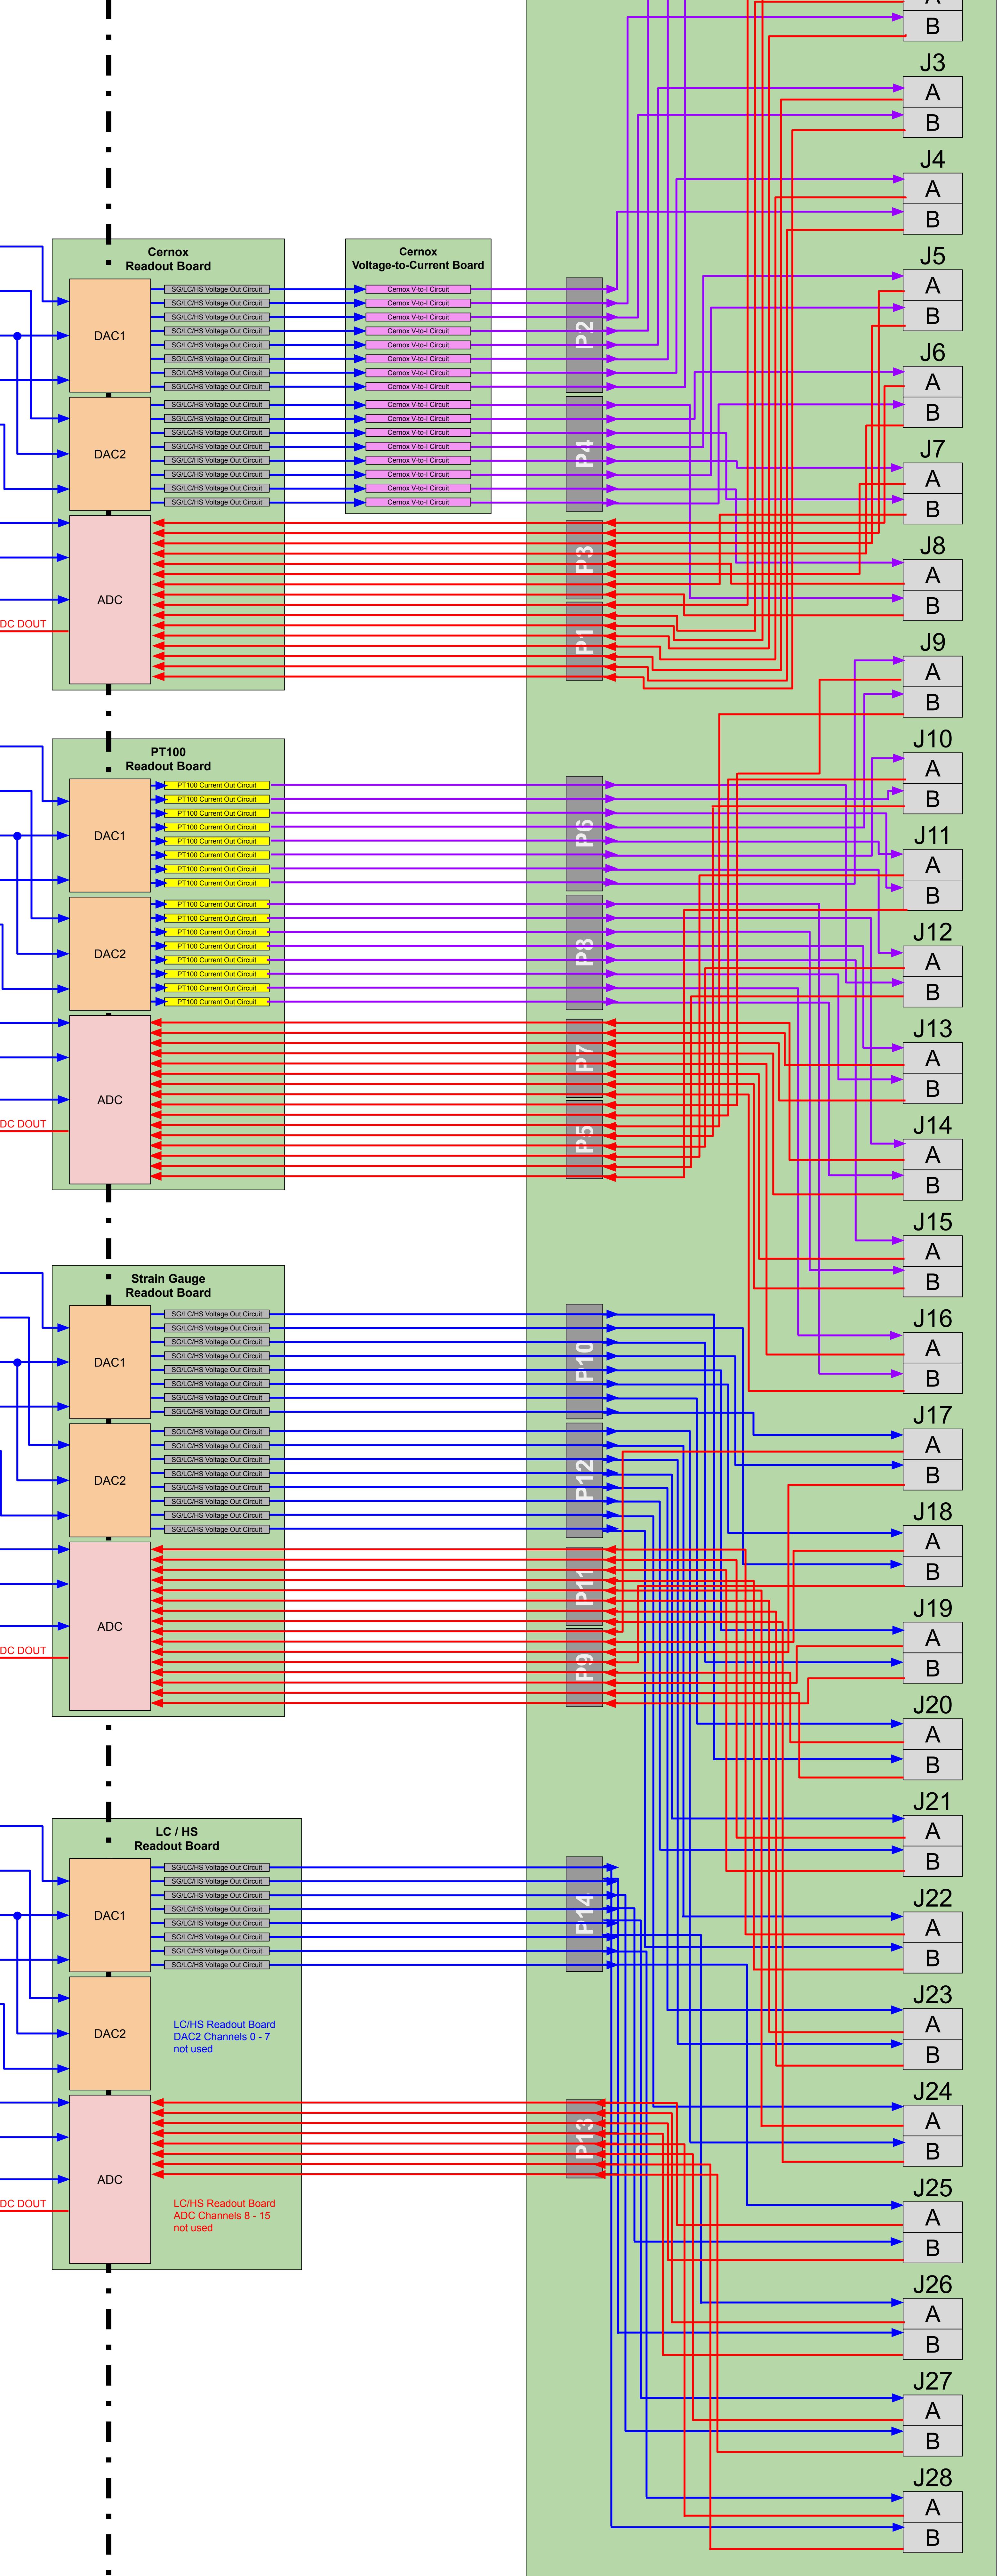

SCLK → Serial Clock  
 CS → Chip Select  
 DIN → Data Input (sbRIO-to-device)  
 DOUT → Data Output (device-to-sbRIO)  
 BD → Board

Voltage  
 Current  
 ADC Voltage

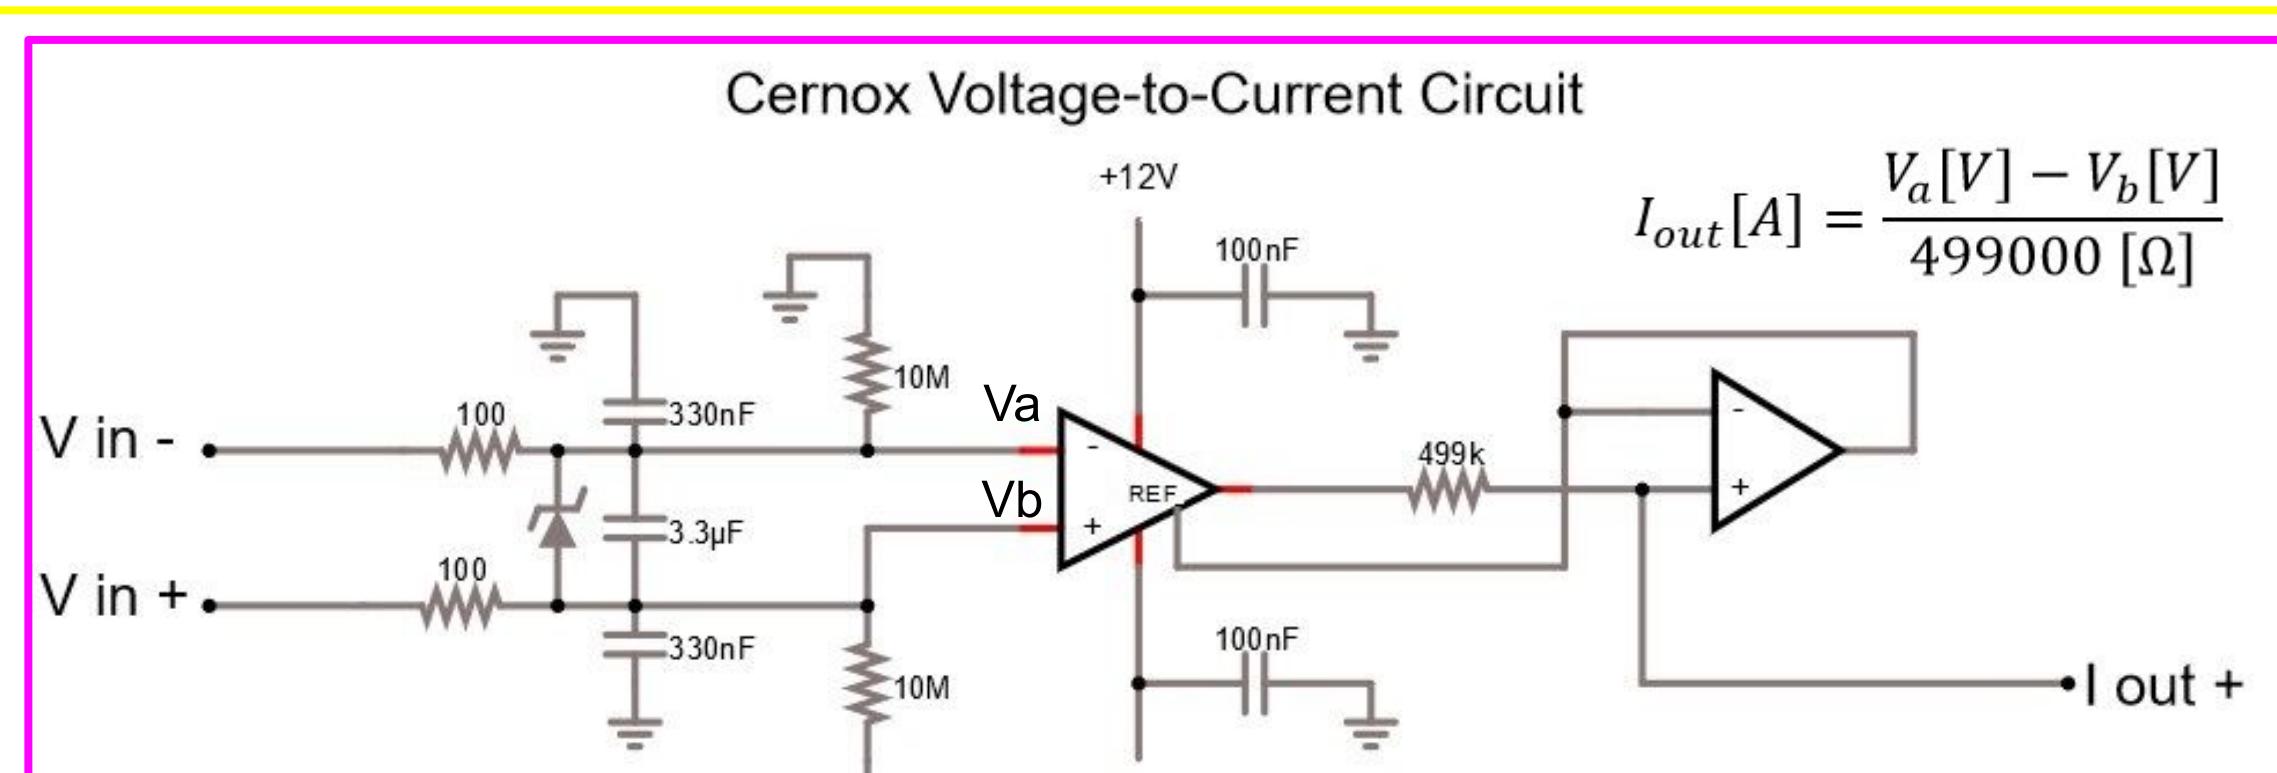

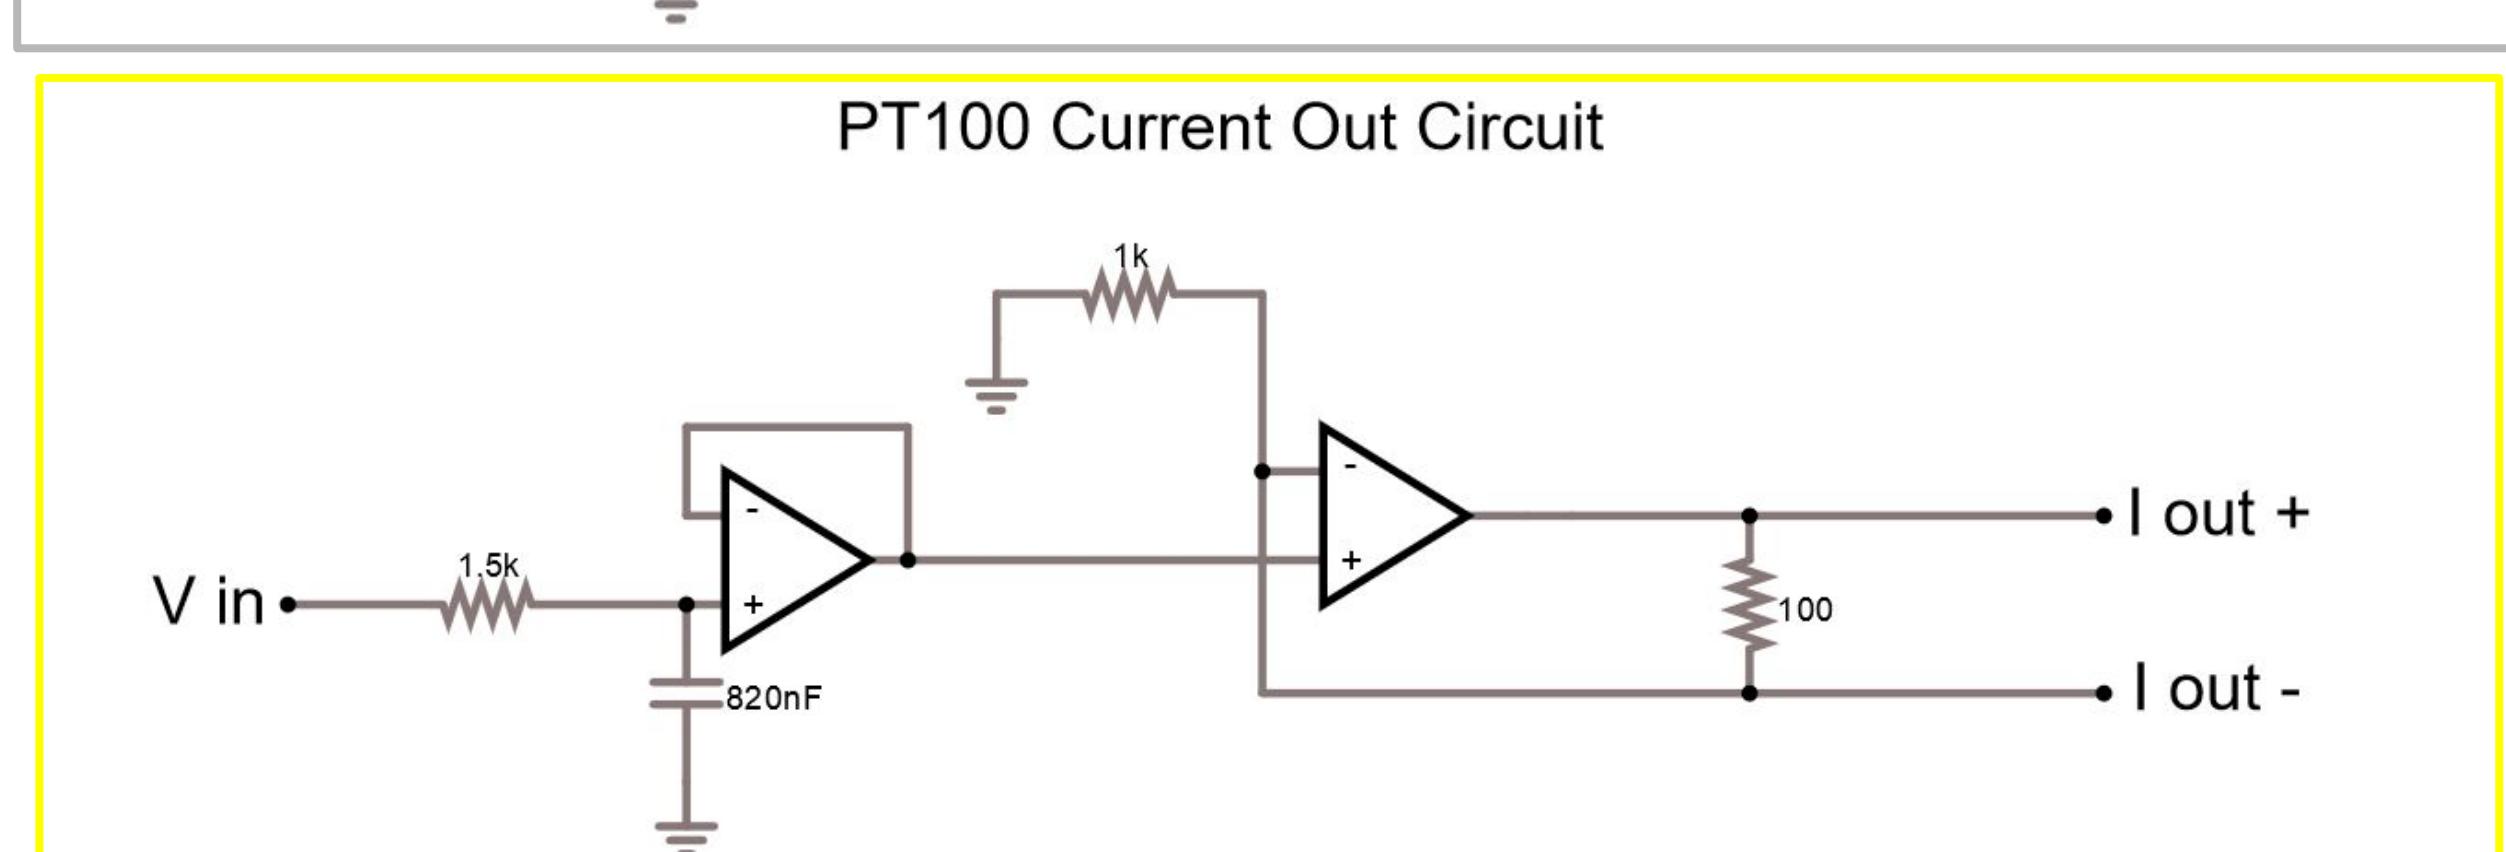

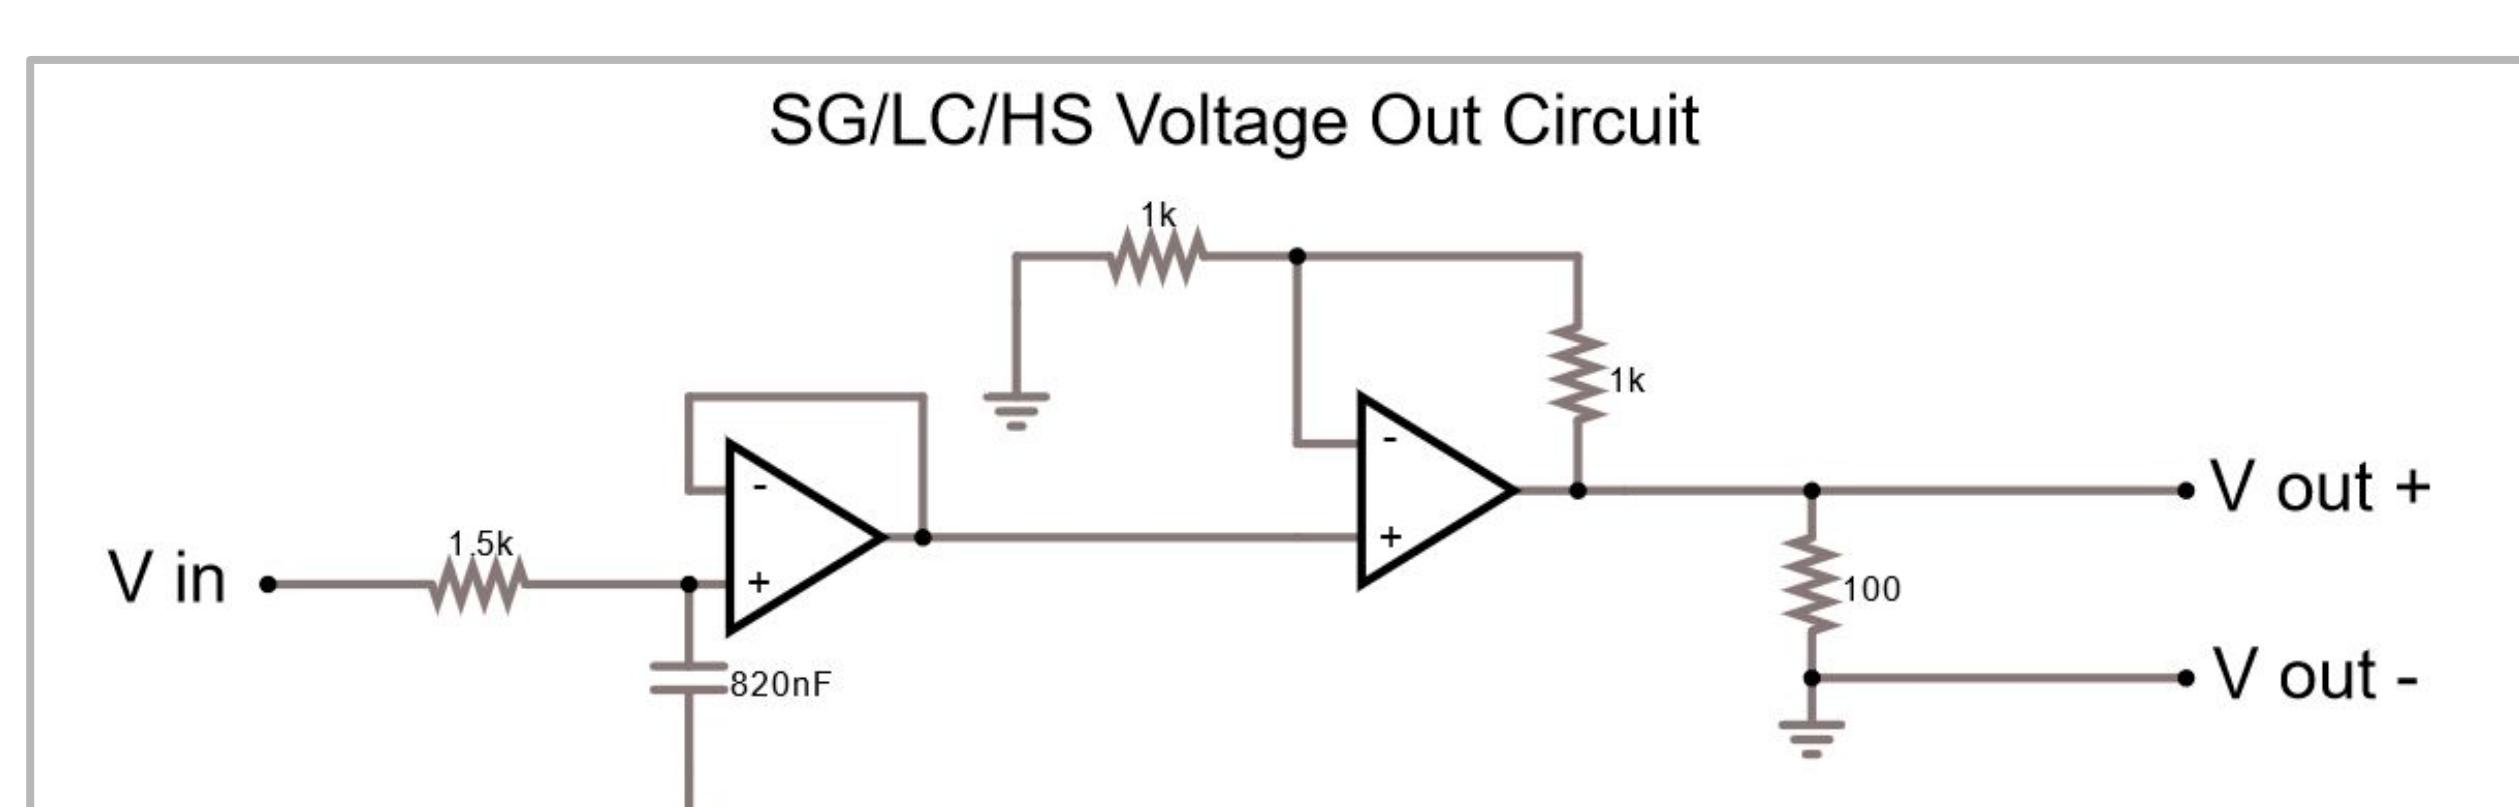

## DIGITAL SIGNALS | ANALOG SIGNALS

NOTE: All analog signals also have a paired ground wire that is not shown in diagram for simplicity

NOTE:  
 DB9 Adapter Board J1 - J28 are shown as plain rectangles to allow for more simplified diagram.  
 In reality, J1 - J28 are 9-pin D-sub (DB9) connectors.

Circuit or Component	Output Type	Minimum Output	Maximum Output
DAC	Voltage	0 V	5 V
SG/LC/HS Voltage Out	Voltage	0 V	10 V
PT100 Current Out	Current	0 mA	5 mA
Cernox Voltage-to-Current	Current	0 μA	11.3 μA

Actual DB9 Connector Pinout on MSELV Chassis
